

## Acton Public Schools Technology Acceptable Use Guidelines for Students

Respect is a core value at our School. These guidelines outline how you are to respect both the computers and other students' work on them. Students are also expected to follow all of the "Technology Acceptable Use Guidelines" as stated in the Student Handbook.

As a student, I ...

- will only use my own password
- will keep my password private
- will respect other people's files and only work on my own files
- will not damage the computer or change the settings on the computer
- will use the computer safely, staying away from food or drinks
- will take care of the computer and keep objects and stickers off of the computer
- will report any problems immediately to my teacher or the adult present
- will only go to websites that my teacher approves

I understand and will follow the rules of this agreement and the Acceptable Use Policy. I understand that if I do not follow the rules it may result in the loss of my computer privileges.
